Master of Public Administration Option in Public Works Administration

This instructional program was approved by the President on April 25, 1989
and the Chancellor on May 20, 1989.

Purpose

The Master of Public Administration Degree Option in Public Works Administration is designed to provide advanced knowledge to practitioners and pre-career students in the growing field of public works management. Coursework prepares students in general public administration and specialized public works management activities, including appropriate technical subjects such as air and water pollution, water supply, waste disposal and management, energy, housing, and transportation. Program emphasis is upon national
